

May 16, 2017

PTA Students,

State Technical College of Missouri's Physical Therapy Assistant (PTA) program that is in conjunction with North Central Missouri College has decided not to house students on the NCMC campus for the 2nd year core program during the 2017-2018 school year. These students will attend State Technical College in Linn, MO. This is due to the low interest and eligibility of students this year.

Students may still take the general education courses that are required to apply for the PTA program at NCMC. State Technical College of Missouri and North Central Missouri College are committed to working together to offer the PTA program. We plan to keep track of the student's interest and revisit the option of housing the 2nd year core program at NCMC again in the future.

For courses at NCMC you may contact Kristi Cutsinger kcutsinger@mail.ncmissouri.edu , Program Advisor, to help with enrolling for the general education courses at NCMC. For information about the PTA program at State Technical College of Missouri, you may contact either the admissions department admissions@statetechmo.edu or Lori Henley, Program Assistant, lori.henley@statetechmo.edu .

Thank you for your interest in the PTA program and I look forward to helping you on your journey.

Respectfully,

Kristi Cutsinger
